

The joint workshop of DTU and UMA

Date: September 10, 2026

Venue: Ada Byron research building, University of Málaga ([map](#))

Meeting point: Andalucía Tech metro station at 8:45, then a short walk together to the venue.

Getting there: take the metro from Guadalmedina station, the closest to the hotel.

8:45	Meet at Andalucía Tech metro station and walk together to the Ada Byron research building.
9:00-9:45	• Welcome: Juan Miguel Morales and Salvador Pineda (5 minutes) • Group presentation, EMA group (DTU) (20 minutes) • Group presentation, UMA group (20 minutes)
9:45-10:15	<i>Session 1: Market and Contract Design</i> • Shobhit Singhal (DTU): Truthful Stochastic Electricity Market Design (5 minutes) • Torine Reed Herstad (DTU): Improved Sequential Market Clearing via Stochastic Transmission Capacity Allocation (5 minutes) • Marco Saretta (DTU): When do Renewable PPAs Benefit Risk-Aware Parties? A Nash Bargaining Approach (5 minutes) • Álvaro Porras (UMA): Accelerating Production Cost Models using AI (5 minutes) • Q&A (10 minutes)
10:15-10:30	Break
10:30-11:00	<i>Session 2: Data, Privacy, and Information Sharing</i> • Lukas Stippel (DTU): Data Unlocked: Privacy Preservation, Public Sharing, and Added Value Creation (5 minutes) • Gloria Tintoré Vidal (DTU): Data-Unlocked Project: Privacy-preserving in data sharing for congestion forecasting (5 minutes) • Alessia Ortile (DTU): Privacy-Aware FCR-D Bidding with Electric Vehicles (5 minutes) • Iratxe Gil Vivanco (UMA): Optimization with Multiple Data Sources: a Distributionally Robust Approach (5 minutes) • Q&A (10 minutes)
11:00-11:35	Long break and <i>group photo</i> (all DTU and UMA participants)
11:35-12:00	<i>Session 3: Reserves, Balancing, and Storage</i> • Valdemar Søgaard (DTU): Multi-area reserve dimensioning in the Nordic power system: EU compliant and dynamic reserve modelling (5 minutes) • Asmus Winther Eriksen (DTU): Sharing the Gains of Aggregation: Cooperative Imbalance Cost Allocation (5 minutes) • Francisco Olivera (UMA): Long Duration Energy Storage based Solutions for Distribution Networks (5 minutes) • Q&A (10 minutes)
12:00-12:30	<i>Session 4: Market Monitoring, State Estimation, and Security</i> • Rasmus Thorgaard (DTU): Detecting Market Abuse: Cross-Border Wash Trading (5 minutes) • Zehang Li (UMA): e-Hawk: A Surveillance Tool to Detect Distortions in the Supply-Side of Electricity Markets (5 minutes) • Tomas Lubiana Herscovici (DTU): Cyber-Physical Security (5 minutes) • José Gómez de la Varga (UMA): State Estimation under Limited Observability: When the Most Accurate Prediction is not the Best One (5 minutes) • Q&A (10 minutes)
12:30-14:00	Lunch
14:00-14:15	Logistics announcement for the next day: hiking at <u>Caminito del Rey</u> (15 minutes)

14:15-14:45	<i>Session 5: Learning, Bidding, and Trading</i> • Ignacio Repiso (UMA): Learning Feasibility into the SOCP Relaxation of ACOPF (5 minutes) • Yannick Heiser (DTU): Trading Wind Power and Hydrogen (5 minutes) • Sofie Davidsen (DTU): Rebound-Aware Bidding for Electric Vehicle Aggregators in the aFRR Energy Activation Market (5 minutes) • Carlos Gamboa (UMA): Context-Aware Wasserstein DRO: Stability and Sensitivity Analysis (5 minutes) • Q&A (10 minutes)
14:45-15:00	Break
15:00-16:30	<i>Group Brainstorming</i> 15:00-15:40: Pick one of the following groups: • Learning and AI for Operations • Data, Privacy, and Information Sharing • Market Monitoring, Integrity and Security • Market Design, Flexibility, and System Adequacy 15:40-16:30: Every group presents 1-2 ideas as potential topics for collaboration or interesting problems to work on
16:30-16:45	Closing remarks
